

SAKSHI

DATA ANALYST

Delhi, India | +91-8699762183 | sakshisinghss0929@gmail.com | [LinkedIn](#) | [Github](#)

PROFESSIONAL SUMMARY

Results-driven Data Analyst with 2+ years of experience in data extraction, cleaning, statistical analysis, and business intelligence within enterprise environments. Proficient in SQL, Python, Advanced Excel, and Power BI/Tableau for building dashboards, automating reporting, and uncovering root causes and trends in large datasets. Skilled in hypothesis testing, regression analysis, A/B testing, and KPI tracking, translating complex data into clear, actionable insights for cross-functional stakeholders. Experienced in ETL pipeline design and Python-based automation, with a proven record of improving reporting efficiency, data accuracy, and turnaround time using GenAI tools.

KEY SKILLS

Data Analysis & Statistics: Exploratory Data Analysis (EDA), Descriptive & Inferential Statistics, Hypothesis Testing, Regression Analysis, A/B Testing, Correlation Analysis, Root Cause Analysis, Data Cleaning & Wrangling, Data Validation & Quality Checks

Programming & Databases: SQL (Joins, Subqueries, CTEs, Window Functions, Stored Procedures), Python (Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn), R, PySpark, MySQL, PostgreSQL, SQL Server, Git/GitHub

Excel, BI & Visualization: Advanced Excel (Pivot Tables, Power Query, VLOOKUP/XLOOKUP, Macros, Multi-layered Formulas), Power BI (DAX, Data Modeling, Dashboards), Tableau, Data Storytelling, Advanced PowerPoint & Executive Presentation Design

ETL & Data Engineering: ETL Pipeline Design, Data Ingestion & Automation, Business-Rule-to-Logic Translation, APIs, Power Apps, Workflow Automation

Business & Compliance Analytics: KPI Monitoring & Reporting, Quality Management Reviews, Corrective Action Planning, Ad Hoc Credit & Campaign Spend Research, Control & Compliance Adherence, Audit Support, BRD/FRD Documentation, UAT Coordination

Communication & Collaboration: Stakeholder Management, Cross-functional Team Mobilization, Issue Escalation, Data-Driven Decision Support, Strategic Thinking, Problem Solving, Working in Matrixed & Global Organizations

GenAI & Emerging Tools: Prompt Engineering, Retrieval Augmented Generation (RAG), AI Agents & Copilots, ChatGPT, Claude, Gemini, Azure OpenAI, Microsoft Copilot

WORK EXPERIENCE

Data Analyst — Great Value Realty

June 2025 – Present

Delhi, India

- Extract, clean, and analyze large enterprise datasets using SQL and Excel to identify trends, anomalies, and root causes behind revenue and spend variances.
- Design and maintain real-time Power BI dashboards with DAX measures to track 10+ operational KPIs, reducing reporting turnaround time by 50% for senior leadership.
- Perform root cause analysis and statistical comparison of actuals vs. expected values, categorizing findings into structured matrices to support data-backed business decisions.
- Conduct data quality checks and validation routines across cross-functional datasets, maintaining 99%+ data accuracy for downstream reporting.
- Build Advanced Excel calculation models (Pivot Tables, Power Query, multi-layered formulas) and executive-ready visualizations to present analytical findings to stakeholders.
- Translate business requirements into structured data logic and reporting workflows, improving analytical process efficiency by 20%.
- Design and deploy automated ETL pipelines using Python and SQL to integrate Excel and SharePoint data sources, eliminating 6+ hours of weekly manual data consolidation.
- Apply Python-based automation and GenAI tools (ChatGPT, Claude, Gemini) to streamline recurring data processing and reporting tasks.

Data Analyst — Aayushi Technology

Jan 2024 – June 2025

- Applied advanced SQL (joins, subqueries, window functions) to analyze 100K+ record enterprise datasets, uncovering trends and root causes that informed business strategy decisions.
- Built Python-based data quality checks and reconciliation scripts to clean and validate large datasets, ensuring 99%+ accuracy for downstream reporting.
- Engineered end-to-end ETL pipelines using Python (Pandas, NumPy) and SQL, automating data ingestion and reducing manual data-processing effort by 40%.
- Developed and maintained Power BI dashboards on cleansed, validated datasets to track KPIs across sales, operations, and customer segments.
- Conducted hypothesis testing, regression analysis, and exploratory data analysis (EDA) to identify patterns and support predictive model development, improving forecasting accuracy by 15%.

KEY PROJECTS

Credit Card Fraud Detection – End-to-End ML Pipeline (Python, Scikit-learn, LightGBM, Pandas, SMOTE, Streamlit)

- Engineered a full ML pipeline on real-world imbalanced financial data; applied SMOTE and feature engineering to improve F1-score by 22%.
- Trained and benchmarked Logistic Regression, Random Forest, and LightGBM models, achieving 94% ROC-AUC; deployed via Streamlit for real-time, business-user-facing predictions.

Movie Recommendation System – Content-Based Filtering (Python, Scikit-learn, TMDB API, Streamlit)

- Built a content-based recommendation engine using cosine similarity on TF-IDF vectorized metadata, delivering 85%+ relevance accuracy via a live API-integrated Streamlit app.

EDUCATION

Bachelor of Technology – Computer Science (AI & ML), CT University | 2020 – 2024

CERTIFICATIONS

- Data Science – Applied Machine Learning & Analytics
- Programming with Python
- Programming with C & C++
- HTML & CSS – Web Development Fundamentals

ADDITIONAL INFORMATION

Languages: English, Hindi, Punjabi

Activities: NCC Cadet – C Certificate Holder | Strong foundation in discipline, teamwork, and structured execution
